

Accepted Virtual Assets

Ousoul upholds transparency on the Multilateral Trading Facility (MTF) and prioritizes the security of clients' funds held in Custody. In this regard, this page outlines basic information on Accepted Virtual Assets permitted on the Custody platform, and further stipulates the supported underlying networks for the respective Accepted Virtual Assets permitted on the Ousoul Custody platform.

Similarly, trading on the Multilateral Trading Facility (MTF) is limited to spot trading activities. All Accepted Virtual Assets admitted into Custody are matched with the US Dollar and are made available to clients as Trading Pairs for spot trading activities.

It is important to note that Ousoul duly conducts assessments of the inherent risks applicable to Virtual Assets prior to listing the Virtual Assets on its platform and continues to do so on an on-going basis, in accordance with all relevant regulatory requirements as published in our [Risk Disclosure Statements](#).

Virtual Asset	Ticker	Supported Network	Trading Pairs
